

Project Design Phase-II
Technology Stack (Architecture & Stack)

Date	22 June 2026
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Example: Order processing during pandemics for offline mode

Reference: <https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/>

Guidelines:

- Include all the processes (As an application logic / Technology Block)
 - Provide infrastructural demarcation (Local / Cloud)
 - Indicate external interfaces (third party API's etc.)
 - Indicate Data Storage components / services
 - Indicate interface to machine learning models (if applicable)
-

S.No	Component	Description	Technology
1	User Interface	Interface for users to explore restaurants, food items, place orders and view trends.	HTML, CSS, JavaScript, Bootstrap, Tableau Dashbo
2	Application Logic-1	Handles user registration, login, authentication and profile management.	Python, Flask
3	Application Logic-2	Handles food search, filtering, cart, order placement and payment process.	Python, Flask
4	Application Logic-3	Performs consumer behaviour analysis and trend identification.	Python, Pandas, NumPy
5	Database	Stores users, restaurants, food items, orders, payments and reviews.	MySQL
6	Cloud Database	Stores datasets and backups for scalability and secure access.	IBM Cloud / AWS RDS
7	File Storage	Stores datasets, reports, dashboards and project documents.	Cloud Storage / Local Storage
8	External APIs	Integrates third-party services for payments, maps and restaurant data.	Razorpay API, Google Maps API, Restaurant API
9	Analytics Engine	Analyses data and discovers consumer patterns and trends.	Python, Pandas, Scikit-learn (if applicable)
10	Reporting / Visualization	Creates dashboards and reports for insights and decision making.	Tableau

REFERENCE	 Python (Flask, Pandas)	 MySQL	 Tableau (Visualization)	 IBM Cloud	 Google Maps API	 Razorpay (Payment G
-----------	--	--	---	--	--	---
