

Project Design Phase
Proposed Solution Template

Date	27 June 2026
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Consumers face difficulty in choosing food due to many options, lack of personalized recommendations, varying prices, delivery delays, and limited insights into ordering behaviour and preferences.
2.	Idea / Solution description	Develop a data-driven food ordering behaviour analysis system that studies customer preferences, ordering habits, spending patterns, popular cuisines, and delivery trends using Tableau dashboards to provide meaningful insights.
3.	Novelty / Uniqueness	Combines food ordering data with consumer behaviour analysis to identify trends, recommend better choices, and help businesses improve customer satisfaction using interactive visualizations.
4.	Social Impact / Customer Satisfaction	Helps customers make informed food choices, saves time, improves user experience, and enables restaurants to understand customer preferences and improve their services
5.	Business Model (Revenue Model)	Revenue can be generated through premium analytics subscriptions for restaurants, advertising, partnership with food delivery platforms, and business intelligence reports.
6.	Scalability of the Solution	The system can be expanded to support multiple cities, restaurants, food delivery platforms, larger datasets, real-time analytics, and AI-based recommendation features
